About me

I am a French student, currently in the second year of IUT Informatique in Annecy. I found a passion in web programming, whether front-end or back-end and application development. My professional goal is to become a fullstack web developer and/or teach in this domain.

Diplomas

DUT Informatique / IUT Annecy USMB Annecy-le-Vieux, France
2020
University diploma in computer science.

Baccalaureat S SVT speciality ISN / Charles Baudelaire High School Cran-Gevrier, France
2018

Graduated from a scientific high school specializing in life and earth science and computer science with honors. ISN stand for IT and digital science.

Work experience

Developer / Un H'Air de Famille Sillingy, France.
2019

Design specifications as well as develop and deploy a site on Wordpress for a hair cutter. Create a Wordpress plugin for the management of site data (such as schedules and cut prices).

Video game developer / Ubisoft Annecy Annecy, France.
July 2018

Selected beyond a team of 12 young people to join Ubisoft Gaming School. Learned how to brainstorm and the basics of video game development. I discovered the job of game designer, gameplay developer and level designer.

Personal skills

I am a passionate, dynamic and rigorous person.

I like to invest myself and complete my projects, whether they are in team or not.

I am curious and therefore very interested in learning and discovering new technologies.

Interests

Videogames

Music

Tennis, running

Travel

Computer skills

C

Basis of algorithmic programming and C++ with SFML library for graphic interfaces.
